◇ Focussed days! The days we enjoy the most

♣ Reflections about the practises

INFORMATION ABOUT THE CENTRE

- It offers exciting active field courses for all grades, from elementary school to university.
- It can be combined Physics, biology, chemistry, physical education and many other subjects.
- It is on the shores of Borrevannet, a nutritious lake with a life of 255 birds registered and distinctive vegetation.

It is formed by two big buildings and 3 garages for storage the stuff.

Having a pier and the right equipment it is possible to practise different aquatic sports.

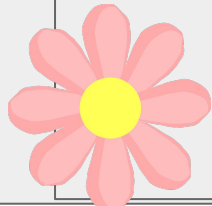

A cozy place to make campfires

The best learning is
learning how to teach

JOAN

The World Of Nature

CONCLUSIONS

- We worked with different age groups on certain subjects and topics so we developed new points of view on how to teach
- All the activities were based on nature and the Norwegian culture
- The working method in the Nature Centre gives everyone the chance to expand their knowledge and gain experience and even improve it, as well as developing manual skills

Thank you for the
attention!
